

Mass spectrometry/Laboratory technologist or Technician

The research laboratory of Dr. Eleftherios P. Diamandis at the Lunenfeld-Tanenbaum Research Institute (60 Murray Street) is seeking to hire a junior technician/technologist whose primary task will be to operate a Mass Spectrometer (Orbitrap-HFX from Thermo Fisher). Some basic experience in mass spectrometry and bioinformatics will be an asset. The technologist/technician will be part of a group of approx. 10 people, which includes graduate students and postdoctoral fellows, working towards identifying biomarkers for cancer, neurodegeneration and COVID-19.

Prospective applicants please send your Curriculum Vitae and names of 3 referees to Dr. Eleftherios P. Diamandis at eleftherios.diamandis@sinaihealth.ca
