

SGS Award Announcement

To: Graduate Chairs/Directors; Graduate Coordinators; Graduate Administrators
From: Pascal Papathanasakis, Graduate Awards Officer, Federal
CC: Joshua Barker, Dean, School of Graduate Studies, and Vice-Provost, Graduate Research and Education; Charmaine Williams, Vice-Dean, Students; Laura Stathopoulos, Director, Graduate Awards and Financial Aid
Date: July 7, 2021
Re: 2022 Vanier Canada Graduate Scholarship (CIHR, NSERC, SSHRC)

Award Overview

Student submission deadline:	5PM Monday, August 30th, 2021 (online application submission)
Deadline for Referees:	Date set by applicant
Value/Duration:	\$50,000 per year for three years
Level of study:	To support PhD, or combined MA/PhD or MD/PhD
Required Legal Status:	Domestic or International
Results:	Early April 2022 directly from Vanier

Purpose:

The Vanier CGS program aims to attract and retain world-class doctoral students by supporting students who demonstrate both leadership skills and a high standard of scholarly achievement in graduate studies in social sciences and humanities, natural sciences and engineering, and health. The Vanier CGS program strongly encourages candidates to pursue their studies beyond the university that granted their previous degree(s).

Eligibility to Apply:

Please refer to the Vanier website for complete [eligibility requirements](#).

To be considered for a Vanier CGS, applicants must:

- be nominated by **only one** Canadian university, which has received a [Vanier CGS allocation](#).
- be pursuing their **first** doctoral degree (including the PhD portion of a joint program including MD/PhD, JD/PhD) full-time at the nominating university in the academic year immediately following the release of results in April. Note that only the PhD portion of a joint degree is eligible for funding;
- have completed no more than:
 - **20 months** of full-time study in their doctoral program as of May 1, 2022; where the doctoral program would begin after the completion of a Master's degree. The months of study completed are calculated from the doctoral enrolment date;

- **32 months** of full-time study in their doctoral program, by May 1, 2022 if:
 - enrolled in a joint graduate research program, e.g., MD/PhD, MA/PhD, DVM/PhD. Applicants in this category have access to the 32-month window whether or not they were previously enrolled in a Master's program. The months of study are calculated starting from the date on which an applicant is officially registered in the joint program (including the Master's portion of the program).
 - accelerated directly from a Bachelor's to a PhD (not previously enrolled in a Master's program); The months of study completed are calculated from the doctoral enrolment date.
 - accelerated (Fast-track) from a Master's degree into a Doctoral program without obtaining the Master's degree. The months of study completed are calculated from the original Master's enrolment date.
- have achieved a first-class average (A-), in **each** of the last two years of full-time study or equivalent;
- not hold or have held a doctoral-level scholarship or fellowship from [CIHR](#), [SSHRC](#) or [NSERC](#) to undertake or complete a doctoral program (or combined MA/PhD or MD/PhD)

Note: Applicants may apply to both the Vanier CGS program and another doctoral-level scholarship/fellowship program (e.g. PGS D) under the same or different federal granting agency in the same academic year, provided that the research proposed in each application falls within the mandate of the federal granting agency to which the application is submitted. Candidates who are successful in both competitions will have to choose which award to accept. Applicants being considered for a Vanier CGS may not apply for a CGS Master's award in the same year.

Nomination:

Applicants must be nominated by the institution at which they wish to study and hold the award. Applicants seeking institutional nomination must first receive the endorsement of their proposed graduate unit through a local selection process. Applicants seeking this endorsement must submit a completed Vanier CGS application using the [ResearchNet](#) application system. Graduate units will view the submitted applications from candidates seeking endorsement via ResearchNet.

[Nomination Letters](#) must be completed and **signed** by the **Department Head** nominating the candidate (see SGS Instructions to Administrators for guidelines on preparing this letter and candidate selection to be distributed later in July).

Application Process:

Applicants should refer to the Vanier website for step by step [application/nomination instructions](#). The ResearchNet application will only be accessible to applicants until the published ***Institution Internal Deadline*** of **Sept 20th at 8pm**, at which time it will go offline.

Applicants **must** complete the entire application process by their ***unit's student submission deadline*** (which may be earlier than the institution deadline) to be eligible for consideration, this includes:

- contacting their proposed graduate unit regarding their specific student submission deadline and requirements;
- submitting a completed Vanier CGS application via [ResearchNet](#); and all original official transcripts to the graduate unit. (**Reminder:** Institutions will be required to include an evaluation/summary of all foreign transcripts. In order to assist with this task, foreign transcripts submitted by the applicant should be accompanied by a grade legend). **NEW** (Optional): If a nominee has international transcripts: They may attach a 250-word summary to describe the variations in the grading system from the country of the transcript and the Canadian level equivalents, and/or explain international credentials and equivalencies. The summary should be a PDF document attached at the beginning of their transcripts.

- Reminder (updated): When applicable, Vanier encourages applicants to systematically examine how differences in identity factors (such as sex, gender, race, ethnicity, religion, age and mental or physical disability) affect the outcomes of research and the impacts of research findings. Applicants are now encouraged to take SGBA+ principles into account in their proposed research (see [Application/nomination instruction - Task 10](#)).
- **NEW:** Applicants who would like to self-identify as Indigenous to be considered beyond their institutions quota must complete the [Vanier Canada Graduate Scholarship \(Vanier CGS\): Voluntary Self-Identification Form for Indigenous Applicants \[PDF \(144 KB\) \]](#). Once completed, the form must then be uploaded as a single PDF document (unprotected) not to exceed 300 MB under “Other” in the “[Attach Application Materials](#)” [Task 11](#)

Please note the following reminders:

- Students are strongly encouraged to complete the “Identify Referee” task on ResearchNet well in advance as referee assessments must be completed and submitted by the referee before the student can complete the submission by the graduate unit deadline. Applicants will be able to determine individual deadlines for their referees on ResearchNet. As a result, there will not be a single deadline for all referees.
- Applicants are required to upload **two leadership reference letters** as separate PDF attachments under the same task (the ability to upload the second letter will appear after the first one has been uploaded). In addition, **two confidential academic assessments** will be requested and submitted through ResearchNet. Note: Vanier recommends that each of these come from four individuals but letters from the same sources will not be declared ineligible.
- **Updated:** All information about interruptions to a student’s academic career, choice of nominating institution, and mobility must be included the Personal Leadership Statement or Research Proposal instead of part of the “special circumstances” document, which now should be used only to describe part-time PhD studies.
- The students’ proposed research project and doctoral program of study must be eligible within the mandate of the agency to which the nomination will be submitted. If there is any doubt (especially for those applying to SSHRC or NSERC whose subject matter touches upon health in **any** capacity), students are urged to email the granting agency directly with a one page summary of their research to seek **written confirmation** in advance of submitting their application. Complete guidelines on selecting the appropriate federal granting agency are available at www.science.gc.ca.

Contacts & Resources:

Graduate unit quotas and instructions for submission to SGS will be forwarded separately later in July.
